

ALL INCLUSIVE ASSISTED LIVING SERVICES

Optional discreet assistance with activities of daily living and medication management are available and included for all Assisted Living Memory Care residents. Complete care with housekeeping, personal laundry services, maintenance, and transportation is also available for residents.

- Certified assisted living facilities may not provide health services such as medication administration or nursing services.
- To be eligible to reside in Assisted Living the resident must be ambulatory or mobile non-ambulatory (move about with an assistive device, but without help from another person) and not be a danger (to oneself or others).

MAINTENANCE-FREE

All utilities are included, aside from phone, so that residents truly can enjoy the programming, activities and events without the worry or stress of maintaining their home.

RESIDENTS DINING

Of course, residents have three delicious and healthy meals per day in their own spacious dining room or delivered to their apartments.

THE BEST FRIEND'S MODEL

We utilize the Best Friend™ Approach, a specialized life enrichment program for residents with dementia or memory impairment.

The Best Friends Approach was developed in Lexington, KY by Virginia Bell and David Troxel at the University of Kentucky's Alzheimer's Disease Research Center.

Our Assisted Living Memory Care Community employs a team of designated caretakers who receive specialized training by a Certified Dementia Care Trainer and undergo continuous training.

Studies have shown that individuals suffering from dementia benefit from a specialized memory care program to decrease isolation, depression, and give them an overall better quality of life.
